

AMBULATORY SURGERY UNIT
LAB & DIAGNOSTIC TESTS

Pre-Admission Labs and Diagnostics

Pre-Surgery Diagnosis:
Scheduled Procedure:
Date of Procedure: Allergies:
Precertification #:

- No Lab Tests Required
Anesthesiology Consultation (Patients with Medical or Surgical issues)
MRSA Screen
Hgb/Hct
Urine HCG
Type and Screen
CBC without diff
Serum Pregnancy
Crossmatch # units PRBCs
CBC w/diff
Quant. HCG
Crossmatch # units autologous Blood
PT
HBsAg
Other blood products
PTT
Sickle Cell Screening
CXR
CMP
Amylase
KUB
BMP
Lipase
Other X-ray
Blood Glucose
Hepatic Panel
Ultrasound
FSBS Day of Surgery
Other Lab
12 lead ECG
Uric Acid
PFT
Urinalysis w/ Micro

Blood for pre-transfusion testing must be drawn within 48 hours of surgery. Typed and Screened blood can only be held 48 hours.

Pre-Surgery Orders OPS (Outpatient Surgery) IP (Inpatient) Unknown Length of Stay

Vital Signs: Per Protocol Other
Diet: NPO NPO after
LR at KVO or 100ml/hr 200ml/hr ml/hr
NS at KVO or 100ml/hr 200ml/hr ml/hr
NS (500ml bag) at KVO via microdrip tubing for renal patient

Medications:

- Pre-Op Antibiotic in ASU/OR holding area
Bacterial Endocarditis Prophylaxis: Consult Pharmacy/Anesthesia
Ancef 1GM 2GM IV in OR
If PCN / B-Lactam Allergy OR Patient at Increased risk for infection
Vancomycin 1GM IV to be started within 120 minutes of incision
Cleocin 900MG IV to be started within 30 minutes of incision
Tylenol suppository by weight in ASU/OR
Other

Consult Anesthesia for post-op pain block

Yes No

(Type of block)

Preparation:

- Incentive Spirometry: Instructions/pre-admit
Thigh / Knee High TED hose
Sequential Compression Device in OR

Minimum Testing Guidelines (Anesthesia Service): These guidelines are suggested minimums. They are not replacement for medical judgment, and the patient's medical history and/or the proposed surgical procedure may indicate additional laboratory or diagnostic testing. No pre-operative laboratory testing is required for asymptomatic patients without significant medical problems who are less than 40 years of age.

ECG: Males aged 40 and above require an ECG. Females aged 50 and above require ECG

Pregnancy Test: A pregnancy test is required for all menstruating females, unless not indicated due to sterility. Serum HCG if blood is drawn for other tests, otherwise it will be a urine HCG.

Labs: CBC and BMP are required for patients age 65 and older. BMP is required for diabetic, renal and/or hypertensive patients. FSBS is required day of surgery in diabetic patients, except in patient who have a BMP done day of surgery.

Copies: A copy of a CXR and/or ECG completed in the past 6 months is sufficient in the absence of a change in the patient's health status. A copy of lab work completed in the past 30 days is sufficient in the absence of renal disease. Renal patients must have a K+ completed after their last dialysis treatment before the date of surgery.

IVF: Every patient over age 10 is required to have an IV of LR at KVO rate. Renal patients must have NS at KVO rate
