Our Location

Main Lobby of Coffee Regional
1101 Ocilla Road Douglas, Ga

It is our honor and pleasure to be able to serve the healthcare needs of South Georgia. With certain acute and chronic conditions, oral medication is not enough. Infusion therapy is a method to treat diseases by administering intravenous medications. The Hanna Family Cancer Center is designed for patient care and comfort, allowing you to benefit from expert care, locally.

We offer a range of treatments in our infusion center including chemotherapy, fluid hydration, injections and more.
